- Analysis: On-chain Data, Macro-Crypto Correlation, Financial Modeling.
- Programming: SQL & Python (Pandas, Numpy, Plotly, Seaborn)
- Marketing: Data-Driven Strategy, Copywriting, SWOT Analysis

LANGUAGE

Indonesian
English

PROFILE

I bridge the gap between institutional-grade quantitative research and strategic community execution. By synthesizing complex macro liquidity trends and multi-chain architectures into simplified, high-signal narratives, I transform passive community channels into active, conviction-driven trading hubs. My approach leverages data-driven insights to foster deep user retention and accelerate organic acquisition, directly translating technical market analysis into measurable transaction volume and platform growth

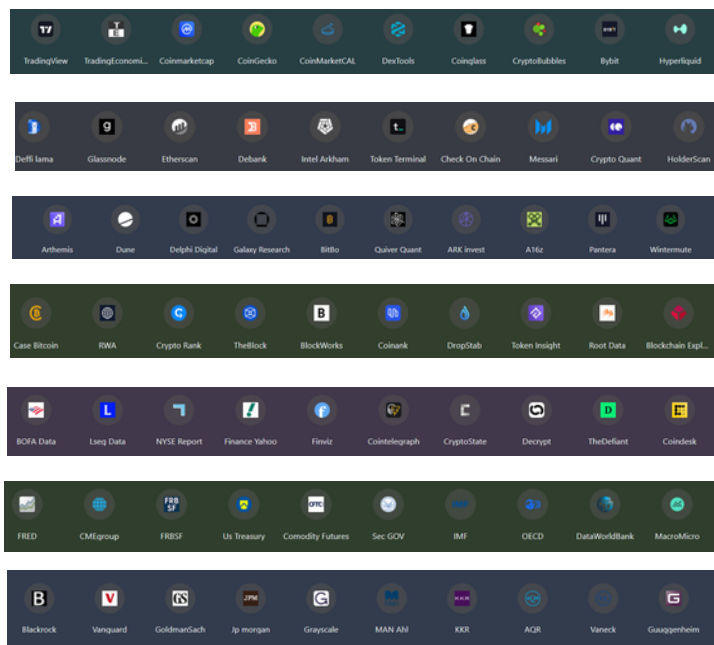

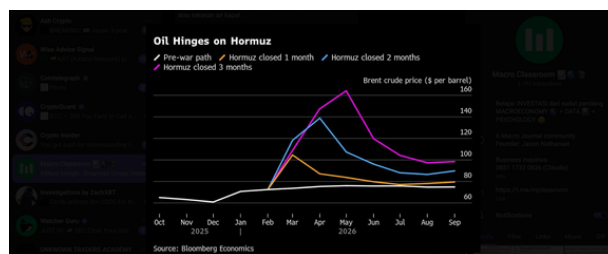

EXPERIENCE

2024 - 2025	Naomediaagency Marketing & Growth Strategist - Strategic Growth: Deployed data-driven marketing and competitor analysis to optimize positioning and user acquisition. - High-Signal Copywriting: Translated complex metrics into sharp, actionable narratives to drive retail community engagement. - Conversion Optimization: Bridged quantitative data with retail psychology to accelerate organic platform growth.

I have many community members who want to share their professional tools.

Free tools that I usually use

- **Macro & TradFi:** FRED, CME, US Treasury, Bloomberg (LSEG).
- **On-Chain & Data:** Dune, Glassnode, Artemis, Token Terminal.
- **Research & Intelligence:** Messari, Delphi Digital, The Block
- **Institutional/VC Tracking:** Paradigm, Blackrock, Goldman Sachs.

I bridge the gap between Traditional Finance (TradFi) and the evolving Digital Asset ecosystem. As a Research Analyst with a rigorous macro focus, my mission is to professionalize the crypto space by providing institutional-grade insights that help traders navigate market complexities and drive strategic community growth.

What I Deliver:

- **Project Performance Audits:** Comprehensive reports for exchanges, analyzing project fundamentals and 1-year relative performance metrics.
- **Macro-Crypto Correlation:** Systematic analysis of how global liquidity, interest rates, and TradFi trends dictate the direction of the crypto market.
- **Systematic Reporting:** High-frequency Weekly updates, deep-dive Monthly reviews, and strategic Quarterly/Yearly outlooks to define market conditions and future trajectories.
- **Strategic Community Execution:** Translating complex quantitative research and AI sentiment data into high-signal, digestible narratives that build retail conviction, minimize churn, and accelerate platform trading volume.

My goal is to transform crypto from a "speculative niche" into a globally recognized, mature asset class by providing the data and clarity required for high-stakes decision-making and sustainable ecosystem growth.
